NVIDIA Corporation

Company research report

Generated 24 October 2026. Compiled from public web sources by an AI agent. Check important figures against the sources below.

Overview

NVIDIA designs and sells graphics processing units (GPUs) and system-on-chip products that power gaming, data-center AI, professional visualization, automotive, and edge computing markets. The company is headquartered in Santa Clara, California, and serves customers worldwide through a broad ecosystem of partners and cloud providers.

Key financials

Stock price	$217.09 (20 Oct 2026)

Products and services

- GeForce RTX GPUs: High-performance graphics for gaming, VR and cloud gaming
- H100 & GH100 GPUs: Hopper-based accelerators for AI training and inference
- DGX systems: Integrated AI supercomputers for enterprise workloads
- NVIDIA AI Enterprise: Subscription-based AI software suite
- Omniverse platform: Real-time collaboration and simulation for 3-D content
- DRIVE AGX: Automotive hardware and software for autonomous driving
- Jetson modules: Edge AI compute for robotics and IoT devices
- EGX edge AI platform: Scalable AI infrastructure for industrial edge

Business model

NVIDIA generates revenue primarily through hardware sales of GPUs and system-on-chip products to OEMs, system integrators, and end-users, complemented by software licensing, subscription fees for AI Enterprise and Omniverse, and revenue-share agreements with cloud providers. Its AI-first platform strategy locks customers into a comprehensive stack of GPUs, SDKs, and cloud services, creating recurring revenue and high switching costs. Strategic partnerships with hyperscalers, automotive OEMs, and enterprise software firms expand market reach, while roughly 20% of revenue is reinvested in R&D to maintain leadership in AI accelerator technology.

Leadership

- Jensen Huang: Founder & Chief Executive Officer
- Colette Kress: President, Chief Operating Officer & Chief Financial Officer
- Michael Kagan: Chief Technology Officer

- James D. (Jim) White: Board Chair

Competitors

- AMD (Radeon RX series)
- Intel (Arc Alchemist)
- AMD (Instinct MI series)
- Intel (Xeon & Habana Labs)
- Google (TPU)
- Amazon (AWS Trainium)
- Graphcore
- Cerebras

Recent news

- 21 Oct 2026: NVIDIA Confidential Computing expands, adding secure services for frontier-model AI workloads
- 21 Oct 2026: NVIDIA advances its Isaac robotics platform with a reference humanoid robot and new simulation tools
- 20 Oct 2026: NVIDIA stock up 1.4% to $217.09 amid a broader rebound in AI-chip shares
