Tesla, Inc.: Company Report

Overview

Tesla is an American multinational that designs, manufactures, and sells battery■electric vehicles, energy storage systems, solar■energy products, and related software services, while operating a Supercharger network and offering autonomous■driving software on a subscription basis.

Products & Services

1. Model S: premium all■electric sedan
2. Model 3: mass■market all■electric sedan
3. Model X: all■electric SUV with falcon■wing doors
4. Model Y: compact all■electric SUV
5. Cybertruck: upcoming all■electric pickup (in development)
6. Semi: upcoming all■electric Class 8 truck (in development)
7. Powerwall: home battery storage system
8. Powerpack: commercial■scale battery storage solution
9. Megapack: utility■scale battery storage solution
10. Solar Roof: integrated solar■panel roofing tiles
11. Solar panels: conventional photovoltaic panels
12. Autopilot/FSD: advanced driver■assistance and full self■driving software (subscription)
13. OTA updates: over■the■air software upgrades for vehicles
14. V2G services: vehicle■to■grid energy services
15. Tesla App subscription features: connectivity and vehicle management

Business Model

Direct■to■consumer sales via online ordering and company■owned showrooms; vertical integration with in■house battery cell production, vehicle assembly, software, and charging network; recurring revenue from software subscriptions (FSD, Premium Connectivity), energy■service contracts, and after■sales service; scale economies from a global Gigafactory network that reduce battery and vehicle production costs.

Leadership

1. Elon Musk, Chief Executive Officer & Technoking: Chairman of the Board
2. Vaibhav Taneja, Chief Financial Officer: appointed 2023
3. Tom Zhou, President, Automotive: oversees vehicle engineering & manufacturing
4. Lars M. Moravy, Senior Vice President, Energy: oversees solar & storage

Financials & Market Valuation

Market Capitalisation $1.47 trillion; Revenue $103.57 billion FY 2024; Profit margin 3.1 %; PE ratio ≈ 409×; Employees approx. 135 k.

Competitors

1. Ford
2. General Motors
3. Volkswagen Group
4. Hyundai■Kia
5. Toyota
6. Rivian
7. Lucid Motors
8. BYD
9. Nio
10. Xpeng
11. Polestar (Volvo/Geely)
12. LG Chem
13. CATL
14. Panasonic
15. Sonnen
16. Enphase

Recent News

1. Q3 2024 earnings: automotive revenue flat YoY at $20 bn; Energy Generation & Storage revenue up 52 % to $2.38 bn; free cash flow $2 bn for the quarter and $3.6 bn FY.
2. Autopilot settlement: Tesla reached a confidential settlement with the family of a teen killed in a 2019 Model 3 crash while using Autopilot, avoiding a jury trial.

Risks

1. Regulatory & Legal: ongoing investigations into Autopilot/FSD safety, potential liability from crashes, and varying global EV incentives.
2. Supply■chain & Battery Materials: dependence on lithium, nickel, cobalt with geopolitical exposure in Chile and Congo.
3. Competitive Pressure: rapid scaling by legacy OEMs and well■capitalised EV start■ups could erode market share and pricing power.
4. Macroeconomic Sensitivity: high■ticket■price vehicles vulnerable to interest■rate hikes, recessionary consumer demand.
